KNOWLEDGE

Cross-sector knowledge sharing: We've made a conscious effort to ensure that the speaker faculty is representative of every major industry

INSIGHT

05

Go back to the office with a whole list of ideas after a jam-packed day of debate, Q&As and interactive roundtable discussions

04

Welcome to... **The 8th Sustainable Shipping, Logistics & Supply Chain** Summit & Exhibition 2018

October 3rd, 2018 at Marriott Hotel, Karachi.

Deliver resilient value chain through industry collaboration and business innovation

Supply chain has often been seen as an area of risk by international corporations. With some of the global players rethinking their business in recent years, value chain work has blossomed into a land of opportunities and innovation.

Whether you are looking to achieve greater transparency, take direct ownership of your supplier factories or looking to rethink your value chain strategy, you will find the answers of your most pressing questions at the Sustainable Supply Chain Summit 2018.

You will be taken to on a cradle to cradle journey with some of the most inspirational corporate leaders sharing their lessons learnt with you. Having said that, don't expect to sit back and listen, as you will be required to actively participate in live voting, intimate round table debates and break-out discussions. We want you to share your views and experiences with your peers.

Summit highlights

The Sustainable Supply Chain Summit is now established as the meeting place for those looking to embed sustainability into their global value chains. The event brings together over 300 senior executives working in supply chain, sourcing, procurement, sustainability, CSR; along with the key government, civil society and association representatives. It is THE place you need to be in order to witness the upward progress of business.

PLENARY SESSIONS

Focus on the big picture and hear about the horizon opportunities (or challenges) that will keep your company ahead of the curve

PRACTICAL SESSIONS

From interactive voting, to live Q&As and brainstorming sessions, collaborate with your peers and help drive collaboration in the sustainability space

PANEL DISCUSSION SESSIONS

Connect with your peers, and other stakeholders in intimate and focused discussions around specific topics

TOPICS COVERED WILL BE:

Business strategy and supply chain sustainability

Historically, for many manufacturers CSR work has started from “greening” supply chains. Due to this supply chain activities have mostly been interconnected with the business strategy, and

often seen through the risk lens. Today priorities have evolved towards creating supply chain opportunities, as it poses lucrative and long lasting business.

How to put a number on your supply chain efforts

To get your supply chain strategy rights isn't an easy task, especially when it comes to putting it in numbers. Many say if you can't measure it you can't do it.

Case study on lifecycle assessment: Enable a low carbon economy

In this session you will learn from a steel manufacturer and a pharmaceutical company about lifecycle assessment of their products. Different in the nature of their industries, the companies will provide unique insights into contextualising lifecycle analysis to business. You will learn about what it takes to:

- Understand the lifespan of your products and services from suppliers to consumers
- Rethink the product and services your company provides to fit them in the future
- Enable the change: Learn how to engage your stakeholders to make the low carbon economy a reality

Beyond audits – build trust and long term relationships with your suppliers

How to make certification and auditing really work for long term business success. Different companies tend to have a variety of ways to engage their suppliers to open up long-term dialogue. This session will cover issues that tend to be a struggle for supply chain practitioners

Ethical trade in action and improved labour conditions

This session will help you to understand how ethical trade principles can benefit your business and how they can be integrated into your sourcing strategy. Drawing from various examples of Ethical Trading Initiative's members you will discover many ways:

Internal Engagement

In this session you will learn how to engage procurement and sourcing departments into your sustainability work. The session will help you to:

- Develop a holistic approach to assessing suppliers for social and environmental risks
- Develop a holistic approach to assessing suppliers for social and environmental risks
- Embed ethical and responsible sourcing practices into sourcing and procurement departments' daily activities

Sustainable agriculture for increased business resilience

It's widely recognised that sustainable agriculture plays an enormous role in improving environmental and social performance of global supply chains. In this session you will learn about:

- Available cost-efficient tools to reduce carbon footprint on a farm level and engage workers in supply chains
- How to help smallholder farmers grow with better yields and less resources

Impact measurement

Join your peers to brainstorm and find out the ways to measure successes or failures of your supply chain work based on outputs.

- Environmental efforts are easier to keep a track of; hence we focus on social measurement with a few strong examples of environmental work.
- Make informed decisions and take the learning back to your office.

R&D and product innovation

This practical panel discussion session will help you to find the ways to innovate at the research and development stage, so you can improve on.

- Eliminate dependency on unsustainable raw materials and diversify your supply
- Waste management: Find buyers and sellers from different industries to minimise environmental impacts
- Innovative collaboration with your suppliers and customers to improve social features of your products

How to get supplier code of conduct and responsible sourcing guidelines right

The keynote session continues our conversation on bridging value chain sustainability and business strategy. This session provides a practical perspective on how to put your corporate supply chain strategy into sourcing guidelines and develop supplier code of conduct that fits your criteria.

Circular economy: What's in it for me and how to achieve it?

In this session we only show practical examples of how circular economy is being integrated in business and what benefits it brings in the space of value chain management.

Customers and consumer engagement

The session will explore the interrelations between your business, your customers, and consumers. Whether you are a B2C or a B2B company you will benefit from learning:

- As a B2C company – how to engage your consumers to minimise your environmental footprint and create positive social impacts
- As a B2B company – leverage sustainability to drive your business forward and win new customers

Create shared value - how to generate change beyond your own supply chain

One of the great examples of industry collaboration to foster wider industry change is Supply Chain Sustainability Graduation in many Business Schools. It is an initiative developed by a group of corporate and developing companies aimed on reducing environmental and social impacts and achieve greater resource efficiency.

Smart way of managing data in a holistic and cost efficient way

This session will help you to identify the best approaches to aggregate information about your suppliers in a comprehensive way ensuring both sides are benefitting.

Put a magnifying glass over the top issues affecting your global supply chains
