Breakthrough Environment, Health and Safety Management – Driving Operational Excellence and Sustainable Business Performance

Join fellow professionals and partners in the Summit for Environment, Health, and Safety (EHS) Management to learn the latest news, innovations, and best practices for leveraging EHS to improve business performance in the asset-intensive industries, including energy and resources, process and discrete manufacturing, consumer products, and transportation. This event will provide opportunities for you to learn from and share with your fellow EHS and IT leaders to take meaningful action in your organization to improve EHS.

Join us May 26, 2016 for the single largest Pakistan's gathering of the EHS community in 2016. There will be an open exchange of innovative ideas on solutions, best practices and lessons for enabling enterprise EHS management systems.

➔ **Network:** In addition, you will have a great opportunity to get to know your peers and build lasting relationships with subject-matter experts throughout the event

About this Conference

This conference will bring together HSE professionals for knowledge sharing, learning and networking. Experts from industry, government, and academia will attend to share insights and best practices. With a strategic location and a theme of "Striving for HSE Excellence–It Takes All of Us," this event will include presentations and discussions to help attendees address the health, safety, security, and environmental challenges facing the different industries.

Topics Covered

- ➔ Environment
- ➔ HSE Management
- ➔ Security
- ➔ Unconventional Development HSE
- ➔ Emergency Preparedness and Response
- ➔ Safety and Health
- ➔ Social Responsibility

Proactive Tools to Enhance HSE Performance

This session will take an in-depth look at how human performance influences HSE. To help organizations understand their internal HSE climate and culture, speakers will present tools to measure, validate, modify, and improve human HSE performance.

Health in the Modern Workplace: Exploring Topical Issues and Innovative Solutions With Industry Experts

As an industry, we need to stay abreast of activities and exposures that threaten our workers' wellbeing. In this session, leaders and researchers from the industry will share observations in today's work environment and voice concerns for occupational health. Participants will discuss available innovations and emerging technology that will help protect their most valuable assets—their workers.

Biodiversity Protection, Conservation, and Management: Live and Let Live

Biodiversity is everywhere, and it represents a key concern for environmental activism worldwide. Ecological awareness is increasing, not only for threatened and endangered species, but also for the broad spectrum of ecosystems around the globe. This session will reveal some of the most challenging biodiversity issues facing the different industries, illustrated with powerful case studies conducted in some of the world's most interesting and diverse locations imaginable. The session also includes the latest about Best Management Practice guidance for Biodiversity and Ecosystem Services.

Social Responsibility: Aligning Priorities Among Communities, Partnerships, and Other Stakeholders

This technical session addresses priorities across stakeholder groups—from a high-level strategic view down through communities and employees—examining how to improve operational performance and achieve a company's social responsibility objectives.

Who Should Attend and Why?

Who Should Attend?

The TPN's Conference for Environment, Health and Safety Management (EHS) 2016 is specifically designed to address the unique business requirements of asset intensive industries including oil & gas, chemicals; and engineering, construction and operations (EC&O).

The event would be of interest to those working in the following functions:

- Environment, Health and Safety (EHS/SHE)
- Operational Excellence and Reliability
- Production/Operations
- Corporate Responsibility/Sustainability
- Risk Management
- Infrastructure/Engineering
- Procurement/SRM
- HR

- Asset Management/Maintenance
- Manufacturing Operations
- Product Safety and Stewardship
- Regulatory Compliance
- Hazardous Materials
- R&D/Projects
- Sales/Business Development

Specifically, it would be extremely valuable to:

- CIO/ CEO/ COO / CTO / CFO
- VP Production
- EHS/HSE Managers
- Production Managers
- Team Leads
- IT and Business Managers
- Press and Analysts

- VP Operations
- Asset Managers
- Operations Managers
- Enterprise Architects
- Directors of IT, HR, Engineering, Financial, Projects, Production & Supply Chain
- SAP Implementation and Complementary Software Partners

Meet, network and build lasting relationships with key decision makers from leading companies, experienced users, members of the user community, product and service partners, solution and implementation experts and corporate executives.

Sponsorship and Exhibit Opportunities are Available!

High impact, cost-effective sponsorship and exhibition packages are available. Gain on-site exposure and connect with industry experts from manufacturing, operations, quality assurance, packaging, shipping, logistics and supply chain as well as representatives from regulatory agencies.

This year's agenda provides ample time for exhibitors to make new contacts and network with attendees who will be seeking solutions and guidance on the handling and distribution of their products. Exhibit at this conference to gain business relationships, connect with key players in the industry and improve your sales. Raise your profile and position yourself as a thought leader. Benchmark against the best-in-class.

In addition, comprehensive tailor-made sponsorship packages will provide your company the opportunity to strengthen brand image, increase visibility and reinforce its commitment.

For more information about exhibit and sponsorship opportunities, please contact:
